Abortion in Kentucky

The KRLA staff has created a document to graph a decline in the number of abortions in Kentucky. These numbers were obtained from the Kentucky Department for Vital Statistics. From 9590 abortions in 1991, there were 3442 in 2014. This is a positive news story, even though far from a happy one.

Breitbart reports that abortion statistics are declining nationally.

Gallup reports that conservatives are trending toward "choice."
